Motion Technology: German Technology enables the applicator heads to be carried directly across the skin without stopping pushing the button yields 3 Shots per second, enabling super fast service

German Xenon Lamps: This new technology will deliver a guaranteed 300,000 shots per lamp

Totally Pain Free: Using wavelengths of 610-950nm for hair removal, via filtered violet light and infrared

FEE: (Fluence Emitted Equally) technology: 6-9 times faster than any other traditional IPL or Laser.

Self Calibration: The self calibration function simplifies the process of calibrating the energy levels, saving time, more efficient and convenient than any other traditional machine on the market.

Water Cooled: Normally only available on top expensive machines to ensure a painless experience

Dual Port Design: Prolongs the life span of the equipment and handpiece. The device identifies the hand piece, uploads parameters and shooting frequency, compensates the energy automatically
